Hologram pyramid template for ipad.

Note that these dimensions are valid for an iPad tablet, but not for a smartphone of other dimensions. Nothing more simple: just type some combinations of keywords like "hologram", "pyramid" and "holho" on YouTube to find a few videos. Without further ado, I've uploaded my own DIY template for the soft plastic, it comes with 3 different sizes for various smartphone screens, the sizes may vary due to the pixel density of Android smartphones but it is accurate for Apple's iPhone. Note: print on A4 size paper, do not check the 'Scale to Fit Media' option when printing. Although it is not real 3D because it is 4 times a 2D images, the result is simply amazing. Update: If you want to try a even easier way, check out our other Instructable that shows how to simply print one. In some cases the tablet has to be placed above the pyramid as is the case in the video of Goku shown above. Remember to turn off the light for an optimal view. To our surprise, it did not seem very complicated: a simple plastic pyramid. Such video must have four different views which will be reflected on the faces of our pyramid to create the hologram when pyramid is placed above or below the tablet (see the figure below). While browsing a little, we realized that the recipe that enabled this small visual prowess is only a few clicks away. Have you seen this yet? Now you can proceed in two ways. I mean, have you seen the actual hologram, for real? If not, it will take you about 20 minutes to get your own pyramid shaped hologram display. We got the intuition of this project from the video below which gives a new lift to Goku, the hero of Dragon Ball Z series. It was enough to arouse our enthusiasm and we hastened to pass this crucial information to our valuable readers. Turns out, the effect is the same and the finish is smoother, lighter too and fold-able. As shown in the photos below, the new lighter plastic is cleaner, clearer and lighter, not to mention easier to cut. So we took the decision to make such a hologram ourselves. Some will prefer to cut four triangles separately and assemble them later with tape. You are advised to seek professional help, since I am an architecture graduate with years of cutting various materials, cutting this is a piece of cake. Others would prefer to cut all the four triangles together and then fold it delicately. Take your time to try out all the different videos that you find on the Web. It took approximately 20 minutes to cut the hard plastic and tape them together, the end result can be seen below. You're welcome. Anyone willing to give tips on this matter is welcome to comment. Right click to download the higher resolution. With much trial and error, I've gone further by measuring the actual size for a few screen sizes that are common in the smartphone market. Then the next step is to find an animation video to be displayed on the tablet. Then we draw, cut and fold the plastic pattern with the following dimensions to make the plastic pyramid. © © Google Cardboard 2015 VR [Review] Pro and Con For safety reasons, a normal cutting blade is not the right tool for cutting hard plastic. Considering that a lot of people are asking for dimensions for bigger devices such as new iPhone 6S Plus or tablets, we created templates for several popular devices. Note however, that using the name hologram here is a bit misleading. Depending on the size of your device, it will be necessary to adapt the dimensions of the pyramid. According to the tutorial, you will need a hard transparent CD casing, which I followed religiously and ended up creating a very rugged looking workable pyramid hologram. Anyone who would like to see the step by step en français, c'est par ici! Updated: January 4, 2022 Home » Download Free Templates So, I found this DIY tutorial on how to create your own 3D hologram for smartphones and Apple iPads. If you find this template useful, do share it on facebook. 100 3D Hologram Pyramid Movie Playlist Hologram-Video for Smartphone and Tablet with Holho Pyramid! Important: Make you Screen on full Power!!! enjoy! List of ingredients: An iPad tablet type A transparent plastic sheet, rather rigid and shiny A cutter A pencil Duct tape First and the only difficulty is remembering the geometry classes from our childhood. They are in attachment and printable. (We know. Looks pretty awesome. Seeing how hard it is to cut the plastic, I've decided to change the material to soft plastic for report binding from CD casing for the 3D pyramid hologram. The original idea comes from American Hacker. Next step, to help you with the choice of videos we are giving you the list of our favorite videos. You could also create you own holographic video, keeping in mind that all areas around the subject need to remain black (the use of a green screen helps) and paste the image 4 times in the screen using a video editing program. Strictly speaking, the creation of a hologram requires the use of a laser beam, where our DIY merely reflects light. When video is played it is reflected on each face of the pyramid to gives us a 3D illusion. Now invert the pyramid and it is ready for use.
